Nowadays people a	ire more aware that v	wildlife all over tl	he world is in danger. Many species of animals are
threatened, and could easil	y become <i>extinct</i> if	we do not make a	an effort to protect them. There are many reasons for
this. In some cases, animal	s are hunted for thei	r fur or for other	valuable parts of their bodies. Some birds, such as
parrots, are caught alive, a	nd sold as pets. For i	nany animals and	d birds, the problem is that their habitat – the place
where they live – is disapp	earing. More land is	used for farms, f	or houses or industry, and there are fewer open
spaces than there once wer	e. Farmers use powe	erful chemicals to	help them grow better crops, but these chemicals
pollute the environment an	d harm the wildlife.	The most success	sful animals on earth – human beings – will soon be
the only ones left, unless w	e can solve this prol	olem.
