KEY

1. Three hundred million people worldwide live in forests.

2. Yes, they are.

3. Because they protect our watersheds, they inspire wonder and provide places for recreation, they supply the oxygen we need to survive and they provide the timber for products we use every day...

4. It impacts people's livelihoods and threatens a wide range of plant and animal species and undermines the important carbon sink function of forests, and causes the greenhouse effect.
5. If human-beings do not protect forests, human will have to suffer more floods and other natural disasters.
