VI. Read the passage and choose the correct answers.

When people litter on the beach, trash can often be picked up after that by cleaners or volunteer workers. However, trash can end up floating on the ocean's surface or lying at the bottom of the sea making it extremely hard to remove. That's why a team of scientists in San Francisco has been working on an ocean-cleaning robot. Over the past few months, the team and the robot have travelled across the United States and picking up trash in the ocean at various public beaches. This is an effort not only to keep the ocean clean and healthy but also to raise awareness for preserving the underwater environment. As of now, the robot is only human-controlled and the team is hoping to develop a more advanced automatic robot in the near future.
