# Wild Round Up

## Round the numbers to the nearest 10!

If the **ones** number is 5 or greater, round up to the nearest 10.

If the **ones** number is 4 or less, round down to the nearest 10.

18 → 20

13 → 10

# Round 'Em Up!

Round the numbers to the nearest ten.

## Rounding to the nearest ten

If the **ones** number is **5** or greater, **round up** to the **nearest ten**. Example:  $1\underline{7} \rightarrow 20$

If the **ones** number is **4** or less, **round down** to the **nearest ten**. Example:  $1\underline{2} \rightarrow 10$

**4 or less, let it rest**

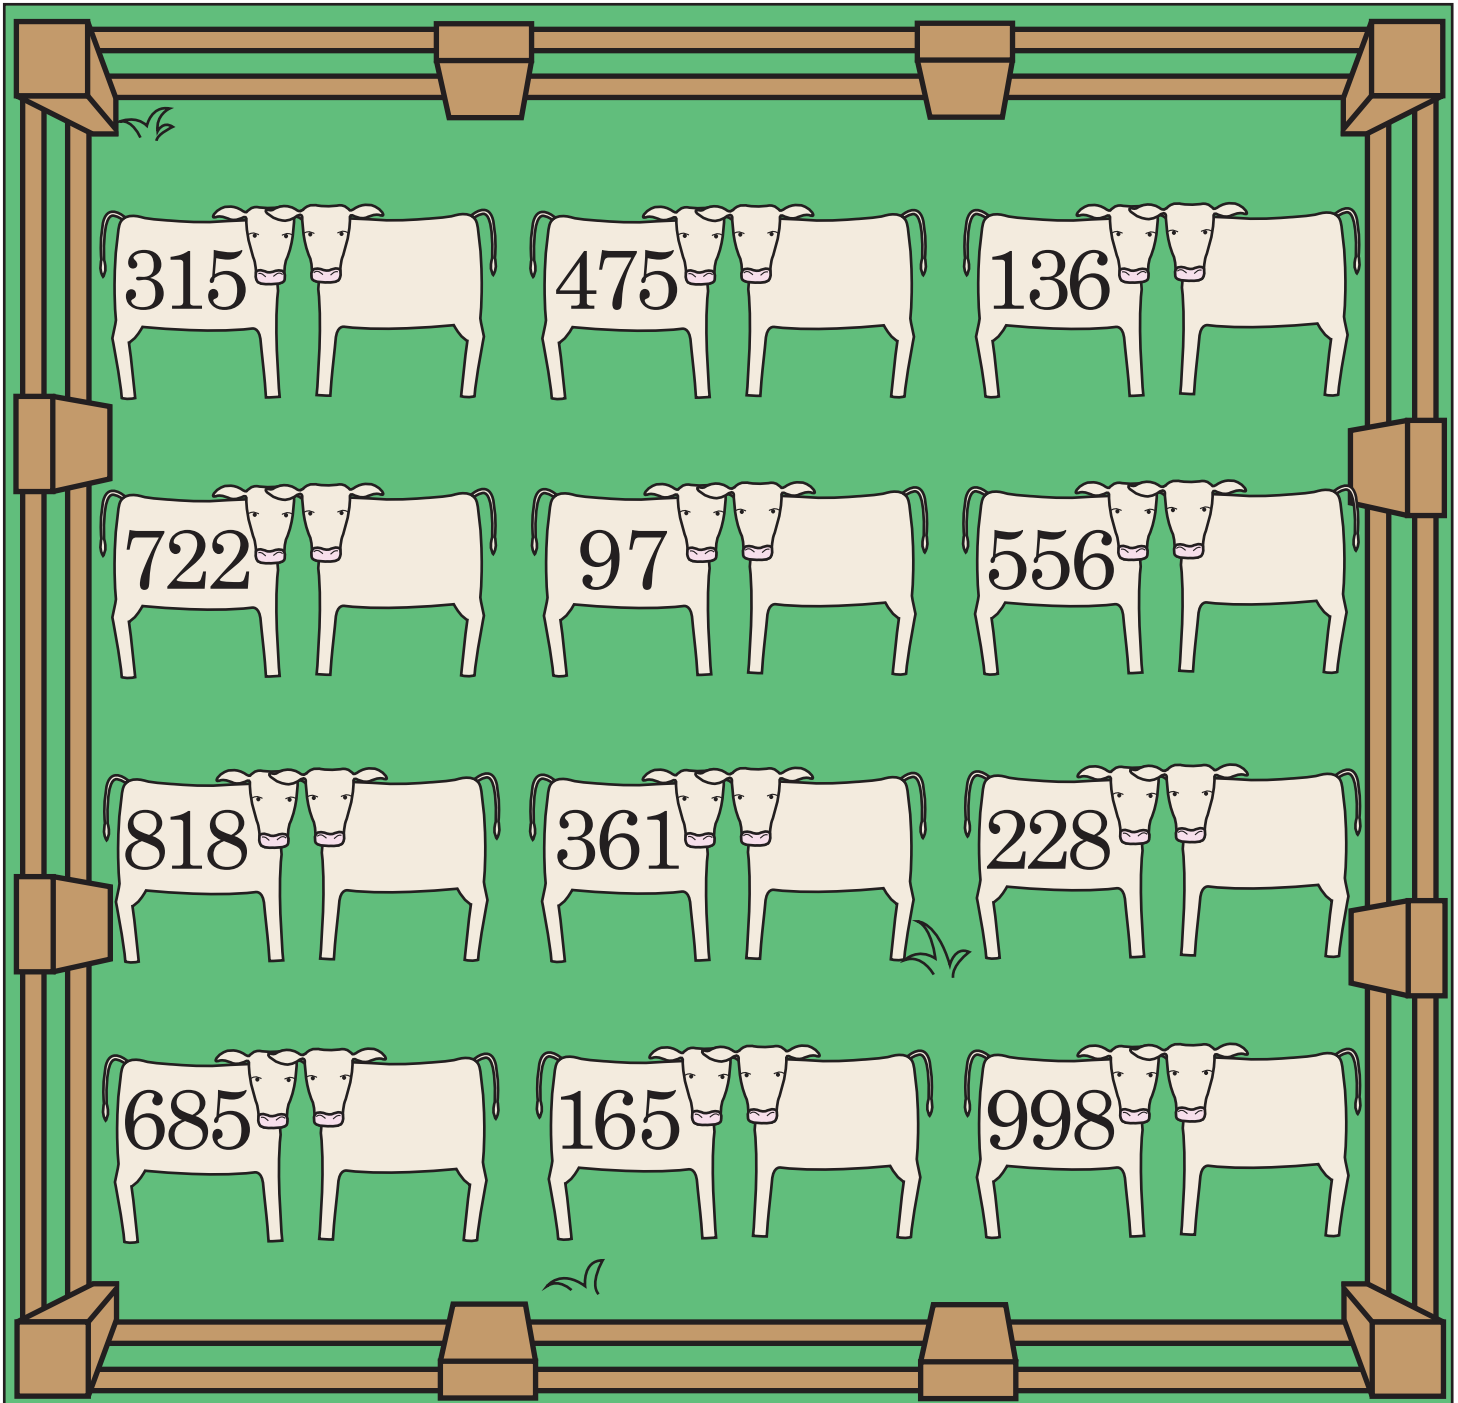

# Wild Round Up

**Round the numbers to the nearest 100.**

If the **tens** number is 5 or greater, round up to the nearest 100.

If the **tens** number is 4 or less, round down to the nearest 100.

$$185 \rightarrow 200 \quad 136 \rightarrow 100$$

# Rounding and Subtracting

Estimating numbers makes you speedy! Round the numbers before subtracting. Remember, when rounding to the nearest ten:

*If the number in the ones place is 5 or greater, round up to the nearest ten.  
If the number in the ones place is 4 or less, round down to the nearest ten.*

Example:  $18 \rightarrow 20$

$14 \rightarrow 10$

Example

$$89 - 11 = 90 - 10 = 80$$

$$77 - 51 = \quad = \quad$$

$$54 - 20 = \quad = \quad$$

$$19 - 12 = \quad = \quad$$

$$74 - 57 = \quad = \quad$$

$$96 - 65 = \quad = \quad$$

$$49 - 34 = \quad = \quad$$
