## Number Patterns

Vicki the vampire just got her invitation to the annual ghoul gala! She is very excited about this year's event, but the invitation is encoded in a "letter-number" cipher. This is when letters are replaced by numbers. Solve the number pattern problems below to decode the cipher and help Vicki figure out the location of this year's party!

The numbers follow a pattern and you will need to add, subtract, divide, or multiply to find the missing numbers.

	E	xampl 2	e: 6	10	14	18	(+4)	The	lette	er is I	N	
A	B	C	D	E	F	G	H		J	K	L	M
1	2	3	4	5	6	7	8	9	10	11	12	13
N	0	P	Q	R	S	Т	U	V	W	X	Y	Z
14	15	16	17	18	19	20	21	22	23	24	25	26

## Conjuring up Expressions

In math, an expression is a sentence containing numbers and operations. A variable is a letter that represents an unknown number in an expression.

Examples of expressions:

4x 8+7 10y+3(y-2)16-5  $\frac{62}{h}$  a-37

\*When a variable is next to a number, it means multiply. So 3x means 3 multiplied by x.

Read the sentences below and write an expression.

There are 17 bats flying through the haunted house. There are x times more bats in the caves behind the house. Write the multiplication expression for the number of bats in the caves.

The number of bats in the house is 17 Times *x* The multiplication expression is 17*x* 

There are 64 pumpkins in the patch. They are divided into y equal groups. Write the division expression for the number of pumpkins in each group.

A witch's broomstick is 4 feet long. Belinda made hers *m* times longer to be able to carry more witches with her. Write the multiplication expression for the length of Belinda's broomstick.

Cara made 52 ounces of witches brew in her largest cauldron. She divided it equally into p number of cups. Write the division expression for the number of ounces in each cup.

Tabitha has *z* black cats. Mark has 3 times as many. Write the multiplication

expression for the number of cats Mark has.

Magícal Measurements

Wendy found her grandmother's recipe for witches brew and wants to make it for her class and for her magic spells club. Her recipe makes one cauldron, which is enough for 60 witches. However, she needs to make a smaller brew to feed 30 witches and another to feed 15 witches. Can you help Wendy halve and quarter the recipe for witches brew by multiplying the ingredient measurements by 1/2 and 1/4?

	1/4 recipe	1/2 recipe
Wítches Brew	Wítches Brew	Wítches Brew
<u>8/3 cup swamp water</u>	<u></u>	<u></u>
4 toad warts	toad warts	toad warts
<u>1 tsp fly's wings</u>	<u>tsp fly's wings</u>	<u>tsp fly's wings</u>
<u>1/2 tsp spíder's legs</u>	<u>tsp spíder's legs</u>	<u>tsp_spider's legs</u>
<u>1 eye of newt</u>	eye of newt	eye of newt
<u>1/4 cup werewolf hair</u>	<u></u>	<u></u>

Wicked Ratios A ratio compares two or more numbers. In the example above, there are six candles and ten suns. The ratio of candles to suns is 6 to 10 or 6:10. The ratio of suns to candles is 10 to 6 or 10:6. The ratio can be simplified by dividing both numbers by the biggest common number. The number candles and suns can both be divided by 2, so the ratio of candles to suns is 3:6 and the ratio of suns to candles is 5:3. 1. What is the ratio of jack o' lanterns to pumpkins? : 2. What is the ratio of crows to bats? : 3. What is the simplified ratio of crows to bats? : 4. What is the ratio of spiders to webs? : 5. What is the simplified ratio of spiders to webs? : What is the simplified ratio of webs to spiders? \_\_\_\_\_: \_\_\_\_\_:

### DUNGEON REMODEL

Count Calloway is remodeling his dungeon before his family comes to visit for Halloween. He wants it to be complete with a hay bed, a concrete bench, stone floor, wood bridge and a moat! Use the area formula to calculate how much the count will spend on his remodel and fill in the table below. (Remember, area = length x width.)

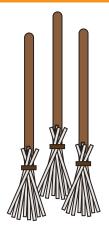

Material	Price/Sq.Ft.	Area	Price
hay	\$3		
concrete	\$7		
stone flooring	\$12		
wood planks	\$6		
moat	\$9		
N		Total =	

### Welcome to Mummy's Market!

Calculate the cost of each item in a package. Don't forget to show your work!

A jar of spiders costs \$15. There are 5 spiders in a jar. How much does each spider cost?

A bushel of brooms costs \$81. Each bushel contains 3 magic witches brooms. How much does each broom cost?

A crate of crystal goblets costs \$72. There are 6 goblets in a crate. How much does each goblet cost?

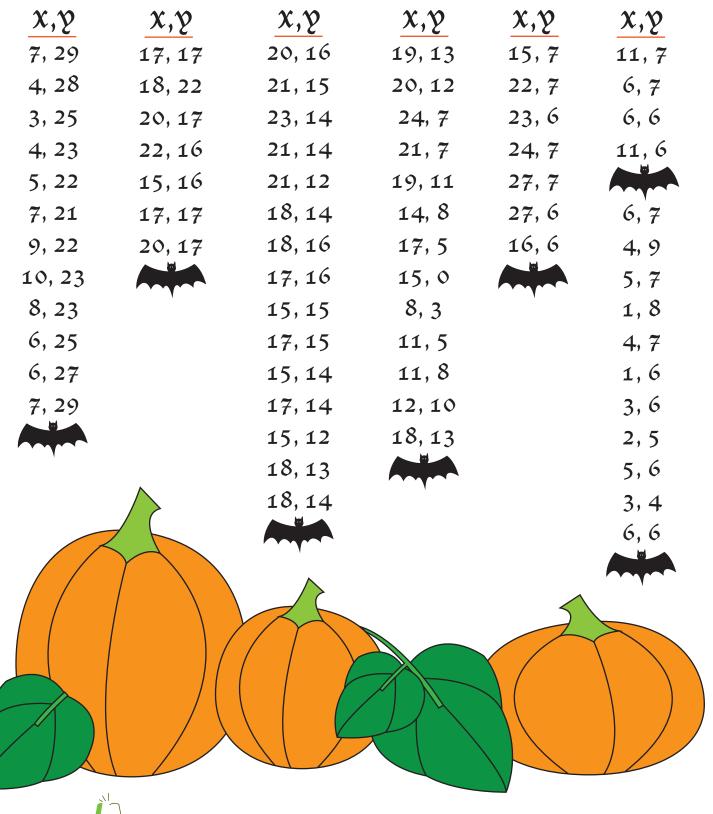

Thelma is excited to see that Mummy's has candles in stock. There is a pack of 12 candles for \$24 and a pack of 20 candles for \$30. Which pack is a better is a better deal?

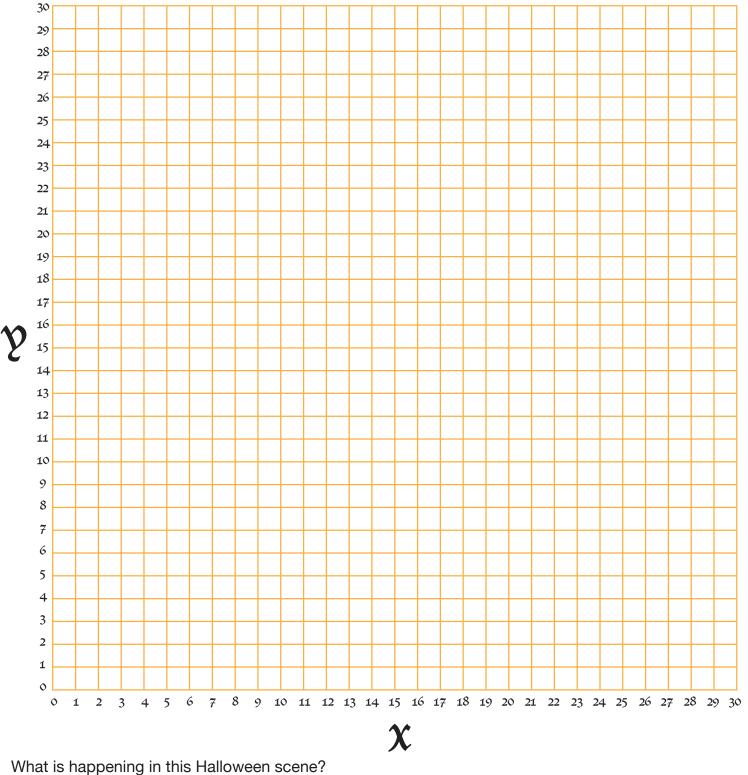

On the Gríd: All Hallow's Eve

Use the coordinates below to reveal the spooky scene that the grid holds. Connect the points with a solid line. The bats indicate where you should pick up your pencil and start a new line. Once you have finished drawing, write down what you think is happening in this Halloween scene!

### On the Gríd: All Hallow's Eve

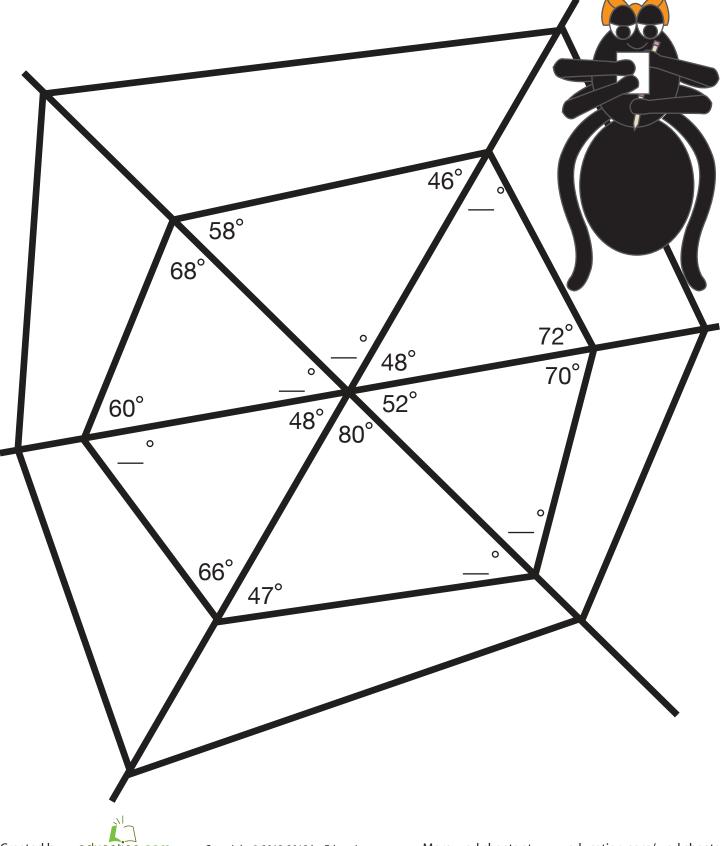

what is happening in this Halloween scene

## Weaving A Perfect Web

Sarah the spider has just finished her web and it's exactly how she likes it. She wants to have a drawing of her web so she can weave this web over and over again. Help Sarah find the missing angles in her web drawing. Remember, all the interior angles of a triangle add up to 180 degrees.

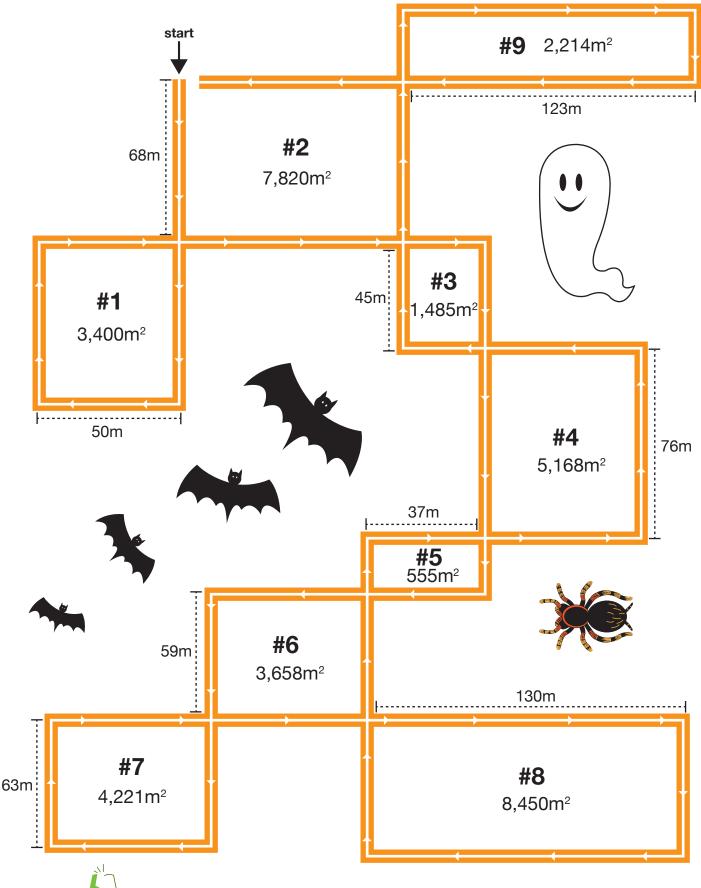

<text></text>
<b>Example:</b> What is the probability of Roger picking gumballs from his basket? $\frac{4}{14} = \frac{2}{7}$
1. What is the probability of picking a chocolate bar?
2. What is the probablility of picking a candy corn?
3. What is the probability of picking a lollipop?
4. What candy is most likely to be picked?
5. What candy is least likely to be picked?
6. What is the probability of picking a candy that is not a candy corn?
7. What is the probability of picking a candy that is not a lollipop?
8. What is the probability of picking a gumball or chocolate bar?
Roger decides to go trick-or-treating down one more street. He adds 4 more lollipops and 2 more
gumballs to his basket. Now what is the probability of picking a lollipop?

#### Trekking Through Transylvania

Page 1 of 2

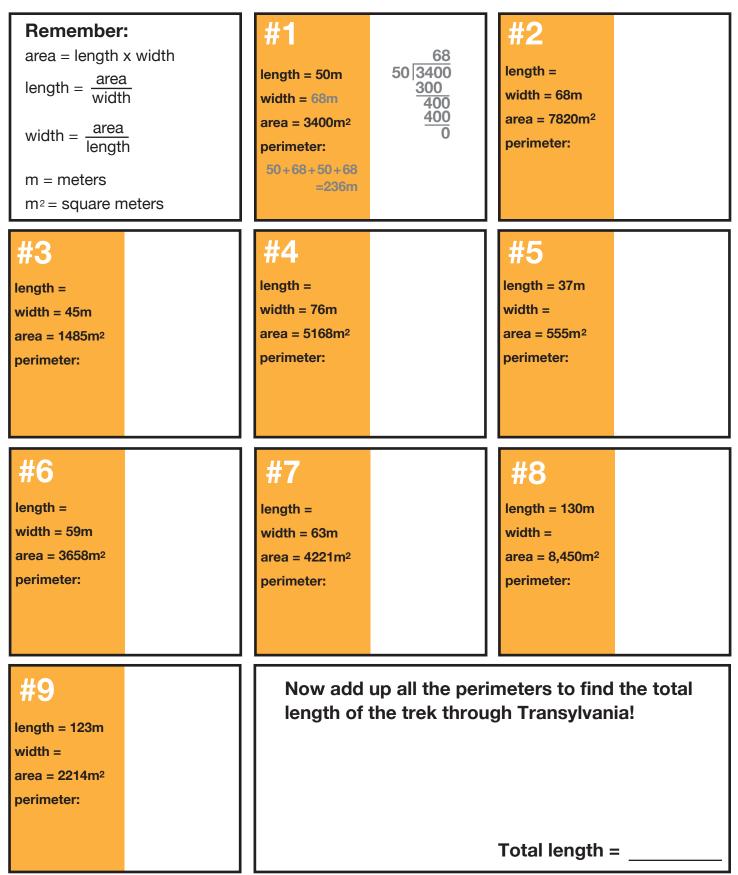

Timmy and Tina are taking their annual Halloween tour through Transylvania. Find the total lengh of their trek by finding the lengh of each segment. In each rectangular loop, the area and the length of one side are given. Use division to find the length of the unmarked side. Once you've found all the lengths, add them together to find the total length.
